Integrated Management and Assessment System
Balancing Food Security, Conservation,
and Ecosystem Integrity in East Africa

Training Manual

by

Randall B. Boone

**Drs. Michael B. Coughenour and Kathleen A. Galvin,
Co-Principal Investigators**

**Colorado State University Subproject under the
Global Livestock Collaborative Research Support Program
USA Agency for International Development**

April 2000

Integrated Management and Assessment System
Balancing Food Security, Conservation, and Ecosystem Integrity in East Africa

Contents	i
IMAS Overview	1
Ecosystem modeling in IMAS	7
Savanna	9
Spatial methods	9
Three primary tools used in IMAS ecosystem modeling	10
The Savanna Modeling System	12
The Savanna Modeling System directory structure	14
Savanna's representation of spatial information	16
Savanna's representation of vegetation within a Cell	18
Initializing facets within Savanna	20
Main files controlling spatial modeling in Savanna	22
Simulation control in Savanna	24
Savanna submodels	27
Weather modeling in Savanna	28
Soil modeling in Savanna	30
Light modeling in Savanna	32
Biomass allocation in Savanna	34
Transpiration-net primary production, establishment	36
Vegetation physiology modeling in Savanna	38
Vegetation population modeling in Savanna	40
Initializing woody cover within Savanna	42
Woody plant growth	44
Decomposition and nitrogen mineralization in Savanna	46
Animal energy balance and populations	48
Animal energy use in Savanna	50
Animal populations in Savanna	52
Animal rates of change in Savanna	54
Animal migration in Savanna	56
Animal diets in Savanna	58
Animal habitat suitability and distributions	60
Restricting animal movements in Savanna	62
Distance to water	64
Disease modeling in IMAS-MCF	66
Disease modeling in IMAS-Rinderpest	68
Households and agriculture in Savanna	70
Household-level economics	72

CONTACT INFORMATION

Queries regarding the Integrated Management and Assessment Project, USAID Global Livestock Collaborative Research Support Program, or the history and development of the Savanna Modeling System may be directed to :

Dr. Michael B. Coughenour
Senior Research Scientist and Co-Principal Investigator, IMAS
B221 NESB
Natural Resource Ecology Laboratory
Colorado State University
Fort Collins, Colorado 80523-1499
USA

Tel: 970-491-5572 (country code 1)
FAX: 970-491-1965
email: mikec@nrel.colostate.edu
<http://www.nrel.colostate.edu/>

Queries regarding economic modeling within Savanna (in development [April 2000]) may be directed to:

Dr. Kathleen A. Galvin
Senior Research Scientist and Co-Principal Investigator, IMAS
B217 NESB
NREL and Department of Anthropology (address as above)
Tel: 970-491-1642 (FAX as above)
email: kathy@nrel.colostate.edu
<http://www.nrel.colostate.edu/>

Queries regarding technical detail about the Savanna Modeling System may be directed to Dr. Coughenour, or to:

Dr. Randall B. Boone
Research Associate
A215 NESB
NREL (address as above)
Tel: 970-491-1964 (FAX as above)
email: rboone@nrel.colostate.edu
<http://www.nrel.colostate.edu:8080/~rboone>

Queries regarding software performance or Sav View may be directed to Dr. Boone.

For software updates and project information see:

<http://nrel.colostate.edu/PROGRAMS/MIKEC/imas/index.html>
